

- 1 In **story.html**, **edit** the `<img>` tag inside the **first-panel** `<div>` and **add** an ID attribute named **first-panel-image**.

```
<div class="panel" id="first-panel">
  <div>
    
  </div>
  <p>First Panel</p>
</div>
```

Do the same with the **first** `<img>` tag in the **second-panel** `<div>`. Use **"second-panel-image"** as ID name.

```

```

- 2 In **layout.css**, **create** a CSS rule for **first-panel-image** to change the shape of the image. It will look like this:

```
#first-panel-image {
  border-radius: 50%;
}
```

Do the same with the **second-panel-image**. **Add** the code so that it looks like the one below.

```
#second-panel-image {
  border-radius: 30px 0px;
}
```

Try these CSS properties to change how your image looks.

### CSS property:

border  
border-color  
border-style

### Value:

any pixel value. e.g 5px, 20px  
red, yellow, #98FB98, etc.  
solid, dotted, groove, dashed
